

Divy Dadheech

Udaipur,Rajasthan,India | P: +91 8824799783 | dadheech120404@gmail.com | GitHub: github.com/1divy2

EDUCATION

VIT-AP University, Andhra Pradesh Aug 2022 – Jul 2026
Bachelor of Technology in Computer Science Engineering
CGPA: 8.28

MDS Public School, Udaipur May 2019 – May 2021
Higher Secondary (Science Stream)
Aggregate: 92.8%

PROJECTS

Parkinson's Disease Prediction using Machine Learning

Technologies: Python, Scikit-learn, Pandas, Librosa, Flask, React

- Built an end-to-end machine learning pipeline to predict Parkinson's disease using biomedical features
- Performed data preprocessing, feature extraction, and trained supervised ML models
- Evaluated models using accuracy, precision, recall, and F1-score metrics
- Developed a backend API and frontend interface for demonstrating predictions
- Followed industry practices by separating code and dataset due to size and ethical considerations

GitHub: github.com/1divy2/Parkinson-s-Prediction

Medi_frend – Medical Assistant Application

Technologies: Java / Python, SQL

- Designed a medical assistant application to manage doctor schedules and patient appointments
- Implemented structured backend logic for appointment tracking and data handling
- Simulated real-world hospital workflows with a focus on modular design

GitHub: github.com/1divy2/Medi_frend

ACTIVITIES

- Developed multiple academic and personal software projects using Java, Python, and Machine Learning
- Actively use GitHub for version control and project collaboration
- Participated in academic projects and technical coursework involving ML and system design

ADDITIONAL

Technical Skills:

Programming Languages: Java, Python, SQL

Machine Learning: Scikit-learn, Pandas, NumPy, Librosa

Web & App Development: React, Flask, Flutter

Tools & Platforms: Git, GitHub, AWS Fundamentals

Languages: Fluent in English

Certifications: MongoDB DBA Certified , Oracle Gen AI Certified
